Services

# Reducing Risk . . .

# predict and prevent

## Setting Us Apart

Risk Management is the process of identifying risk and mitigating the prospective loss. Using the latest innovative techniques and practices, our risk control team provides a personalized risk control product tailored specifically for your district.

We believe sound risk management is the backbone for the tremendous success the United Schools Insurance Program (USIP) has enjoyed for years. This aggressive, but proactive, approach keeps losses to a minimum, while maintaining high quality services, broad coverage and competitive rates.

Our staff takes the extra time to understand the individual environment within each USIP member. For example, if your District has a unique or specific area of concern, we will customize a program to fit your individual needs.

All services are available regardless of size or location. Services are conducted with sensitivity to budgets and entity needs, while maintaining flexibility in implementing recommendations. To schedule any of the risk control services, please contact Canfield & Associates at: **800-407-2027 ext. 262.**
